Pricing Procedure for Doors and Drawer Fronts

The price for any custom door or drawer front can be easily calculated by inserting the relevant numbers into the chart below. A brief explanation and/or a page number for reference is given for each required number. An example is shown.

Example— 1 CRP-10 with radius corners in Premium Hard Maple, 1" thick, 15" x 25"

$$(\$11.25 + \$2.60) + (\$13.85 \times 1.30 \times 1.35 \times 2.60) = \$77.05$$

Product Design Choices

All Conestoga's prices include choice of edge profile, framing bead and panel raise. However, Sophisticate and LC-Insert edge profiles incur an extra charge. For complete details on our options and associated prices, see the Design Options section.

Before pricing a door or drawer front, verify the availability of the desired options on the design by referring to the Offering and Availability table found immediately after each door design page.

Multiple panel doors have design charges equivalent to the number of panels ordered. As an example, a CRP-10 with three panels uses the design charge of $\$11.25 \times 3 = \33.75 . This policy excludes doors that come standard with multiple panels (i.e. CRP-10102). *Due to construction complexity, all multiple panel mitered doors include an additional charge of \$39.00 per upright or middle rail plus the per-panel design charge.*

For pricing and ordering appliance panels, see the Design Option section.
